FIRST SET OF INFORMATION REQUESTS OF THE
DEPARTMENT OF TELECOMMUNICATIONS AND ENERGY TO
KEYSPAN ENERGY DELIVERY NEW ENGLAND

D.T.E. 1-6

Respondent: Elizabeth D. Arangio

Date of Response: June 27, 2006

Q. Refer to Exhibit 1, at page 7 (Article III). Explain in detail how the voting process works for both Long Haul and Short Haul customers.

A. There are seven ANE II Short Haul Customers, with combined 2006 and 2007 contract volumes of 281,336 dth/day. When an issue specific to this group is presented to the Short Haul Customer Group, a vote of least 60% (168,802 dth/day) is required for the measure to be implemented.

Similarly, there are five ANE II Long Haul Customers, with combined 2006 and 2007 contract volumes of 169,355 dth/day. When a specific issue related to the Long Haul Customer Group is presented, a vote of at least 60% (101,613 dth/day) is required for the measure to be implemented. For issues that apply to both Long Haul and Short Haul Customers (total volume 450,691 dth/day) a vote of 60% (270,415 dth/day) would be required for the measure to be implemented.
